

Education Services

Safe Schools Advisory Committee Mandate:

The Ministry of Education consulted extensively on the Safe Schools Provisions of the Education Act, and the Legislative Amendments, related Policies and Regulations. As Boards move ahead with the development and implementation of policies and programs to meet Ministry requirements to support the Safe Schools Strategy it is expected that they will actively engage all stakeholders including police agencies, community agencies, students and parents. An advisory committee that focuses on all aspects of school safety should be established at the board level. The Committee will facilitate two- way communication that ensures safe, effective and respectful learning environments.
